

Constraints

1 ≤ length ≤ 1000

All the characters of input are made of English alphabets and digits

Output Format

Print ten space separated integers in a single line denoting the frequency of each digit from 0 to 9

Sample Input 0

a114720516

Sample Output 0

0 2 1 0 1 1 1 1 0 0

Explanation 0

In the given string:

- 1 occurs two times.
- 2, 4, 5, 6 and 7 occur one time each.

The remaining digits 0, 3, 8 and 9 don't occur at all.

Answer: (penalty regime: 0 %)

```
1 #include <stdio.h>
2 #include <string.h>
3
4 int main() {
5     char num[1001]; // Input string
6     int freq[10] = {0}; // Frequency arr
7
8     // Input the string
9     scanf("%s", num);
10
11     // Calculate digit frequencies
12     for (int i = 0; i < strlen(num); i++)
13         if (num[i] >= '0' && num[i] <= '9')
14             freq[num[i] - '0']++;
15
16 }
17
18 // Print the frequencies
19 for (int i = 0; i < 10; i++) {
20     printf("%d ", freq[i]);
21 }
22 printf("\n");
23
24 return 0;
25 }
```

	Input	Expected	C
✓	a114720516	0 2 1 0 1 1 1 1 0 0	0
✓	1w4n88j12n1	0 2 1 0 1 0 0 0 2 0	0
✓	1y888861256338ar0ekk	1 1 1 2 0 1 2 0 5 0	1

Passed all tests! ✓

Note: The following letters are vowels: 'A', 'E', 'I', 'O', 'U', 'a', 'e', 'i', 'o' and 'u'.

Input

The first line consists of an integer T denoting the number of test cases.

Each test case consists of only one string, each character of string denoting the alphabet (may be lowercase or uppercase) on a tree in the garden.

Output

For each test case, print the count in a new line.

Constraints

$$1 \leq T \leq 10$$

$$1 \leq \text{length of string} \leq 10^5$$

SAMPLE INPUT

2

nBBZLaosnm

JHklsnZtTL

SAMPLE OUTPUT

2

1

Explanation

In test case 1, a and o are the only vowels. So, count=2

Answer: (penalty regime: 0 %)

```

Given a sentence, s , print each word of the sentence in a new line.

Input Format

The first and only line contains a sentence, s .

Constraints

$$1 \leq \text{len}(s) \leq 1000$$

Output Format

Print each word of the sentence in a new line.

Sample Input 0

This is C

Sample Output 0

This
is
C

Explanation 0

In the given string, there are three words ["This", "is", "C"]. We have to print each of these words in a new line.

Answer: (penalty regime: 0 %)

```
1 #include <stdio.h>
2 #include <string.h>
3
4 int main() {
5     char s[1001]; // To store the input
6
7     // Read the input sentence
8     fgets(s, 1001, stdin);
9
10    // Iterate through each character in
11    for (int i = 0; i < strlen(s); i++) {
12        if (s[i] == ' ') {
13            printf("\n"); // Print a new
14        } else if (s[i] != '\n') {
15            printf("%c", s[i]); // Print
16        }
17    }
18
19    return 0;
20 }
```

Input Format

You are given two strings a and b , separated by a new line. Each string will consist of lower-case Latin characters ('a'-'z').

Output Format

In the first line print two space-separated integers, representing the length of a and b respectively.

In the second line print the string produced by concatenating a and b ($a + b$).

In the third line print two strings separated by a space, a' and b' . a' and b' are the same as a and b , respectively, except that their first characters are swapped.

Sample Input

abcd

ef

Sample Output

4 2

abcdef

ebcd af

Explanation

$a = \text{"abcd"}$

$b = \text{"ef"}$

$|a| = 4$

$|b| = 2$

$a + b = \text{"abcdef"}$

$a' = \text{"ebcd"}$

$b' = \text{"af"}$

Answer: (penalty regime: 0 %)

```
1 #include <stdio.h>
2 #include <string.h>
3
4 int main() {
5     char a[101], b[101]; // Declare strings
6     scanf("%s", a);      // Read string a
7     scanf("%s", b);      // Read string b
8
9     // Print lengths of a and b
10    printf("%lu %lu\n", strlen(a), strlen(b));
11
12    // Print concatenated string
13    printf("%s%s\n", a, b);
14
15    // Swap the first characters of a and b
16    char temp = a[0]; // Store the first character of a
17    a[0] = b[0];      // Replace the first character of a with b[0]
18    b[0] = temp;      // Replace the first character of b with temp
19
20    // Print the modified strings
21    printf("%s %s\n", a, b);
22
23    return 0;
24 }
```
